Covid-19 Applications

Silicone Solid Comfort Strip

kSil® strip inserted at the top of the shield provides the wearer with extra comfort for the forehead, and also aids keeping the mask in place.

Solid Silicone Protective Face Shield Strap

kSil® head straps for face protection shield

Silicone Sponge Dampening for Ventilators

Silicone sponge parts used to effectively dampen and absorb vibrations from ventilators and respirators.

Silicone Sponge Air Vent Gasket

Silicone sponge gasket used to seal and protect air vents in critical operating theatres.
