

Critical Infrastructure Manufacturer

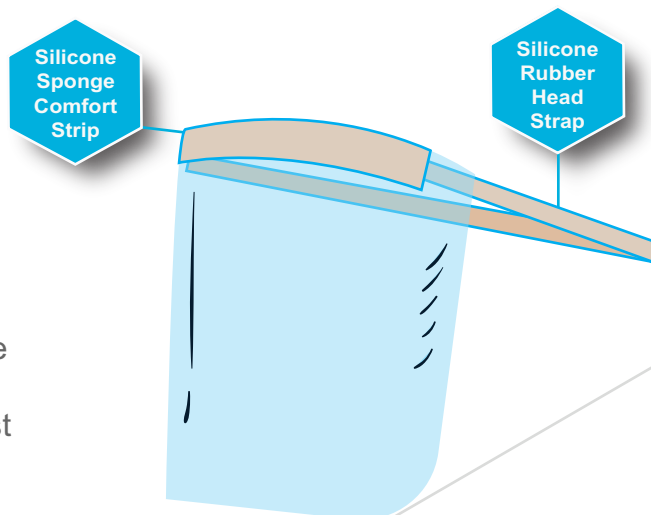

Covid-19 Silicone Applications

Silicone Engineering have been supporting frontline health workers by providing silicone materials to critical PPE applications, plus parts for medical devices and components.

Silicone Sponge Comfort Strip

kSil® sponge strip inserted at the front of the shield provides the wearer extra comfort for the forehead, whilst keeping the mask in place.

Silicone Rubber Head Strap

kSil® head straps give the elasticity and flexibility for comfort, whilst being easy to clean down after use.

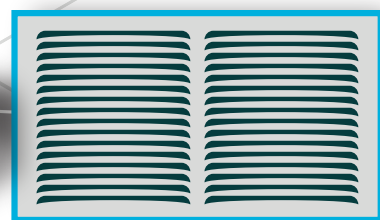

Silicone Sponge for Ventilators

Silicone sponge parts used to effectively dampen and absorb vibrations from ventilators and respirators.

Silicone Sponge Air Vent Gasket

kSil® silicone sponge gaskets used to seal and protect air vents in critical operating theatres.
